

## Warehousing

### Warehousing and E-fulfilment

Gideon Hillman Consulting, a corporate member of UKWA (UK Warehousing Association), are leaders in Warehouse Consulting. Our specialist consultants have developed with the market requirements and have successfully completed a number of

E-fulfilment projects with prestigious clients including, [Diet Chef](#), [DOS](#), [Royal British Legion](#), [Urban Retreat](#) and most recently [Bodybuilding.com](#)

### We work with our clients and achieve

- New Build design & re-configuration of existing warehouse, picking & distribution facilities
- Optimised facility design/ layout, handling practices and workflows.
- Warehouse and inventory management techniques to optimise workflow and costs.
- Cost to serve, travel times and pick rate modelling to support the optimised layouts
- KPI development and Performance Management
- Automation and Materials Handling Systems design and development.
- Tactical stock location(s) and picking strategies.
- Improved demand forecasting to allow for optimised inventories.
- WMS Operational Requirements Specifications.
- Vehicle fleet profiling and resource requirements aligned with DC and customer requirements
- Implementation of Bonded (Excise) Warehouse facilities in accordance with HMRC procedures

**Our warehouse and logistics team are highly expert in** reviewing current process, current operations and developing solutions for all areas of Materials Handling; Procurement, Warehouse and Inventory Management including: Tactical Stock Location, Picking processes, Inventory Control and Demand Planning, Vendor Support Operations, Warehouse Performance and Cost Measurement with specific expertise in e-fulfilment operations.

**Our Warehouse and Distribution Centre Design Consultants** have a detailed knowledge and understanding of what is actually required to operate an efficient Distribution Centre, warehouse and picking / despatch operation. All our analysis and solutions specific to your requirements are presented with clear and concise rationale and where appropriate costed and tested. The team (and client) also benefit from the company's in-house CAD facilities for warehouse layouts, racking configuration, automation and MHE and logistics resource planning.
